

# A very modest presentation about gifted education

(slightly longer than a “hello”  
on behalf of every fellow)

*Welcome,  
welcome, dear  
guests  
from North and  
South, East and  
West,  
representing  
every nation  
involved in gifted  
education!*

*Avoid miscommunication  
and use this short  
interpretation  
of phrases, gestures,  
sailor's flags:  
help yourself with  
welcome bags!*

*Bon giorno, Morning,  
Buenos dias,  
let us share nice ideas!"!*

Thus Nick Colangelo (the Great) Laurie, Susan Assouline Candice, Ann and Jerilyn, Maureen and David - all have made a perfect friendly atmosphere for us to feel at home in here.

All of us at this great meeting showed fantastic talents: Eating, laughing, hard working, talking, sharing stories sometimes shocking (there was hardly time for shopping If by any chance you were hoping)

The languages  
mainly spoken  
were kinds of  
English  
(slightly broken)

but everybody  
felt wiser

since friendship is  
the best adviser:

*Ki kati , Kia ora*  
*Olá, Hello,*  
create a family of  
fellows  
of *Templeton great*  
*foundation*  
far beyond  
imagination;  
and *Belin, Blank* are  
inspiration  
for all involved in  
education.

The *Richey hall* was always full the atmosphere – “really cool” to that extent the Russian bear would feel completely happy there...

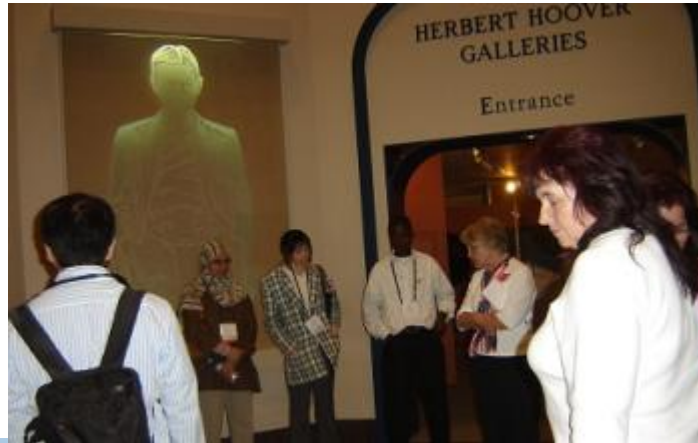

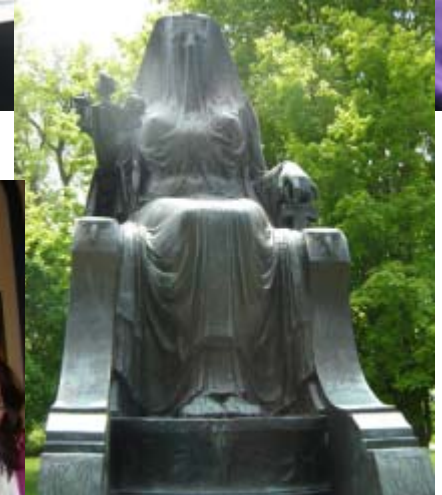

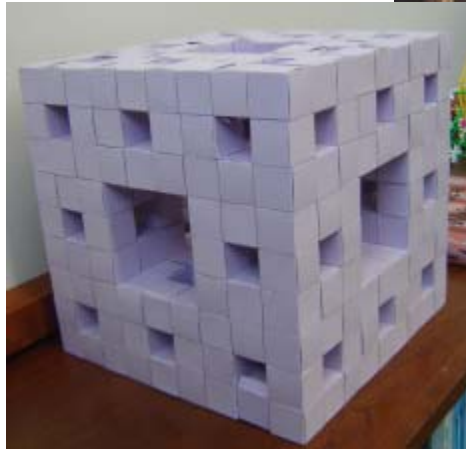

But we were all quite warm at heart and didn't find it very hard since all the lectures were amazing and our admiration – raising! With many methods innovative all of us became creative

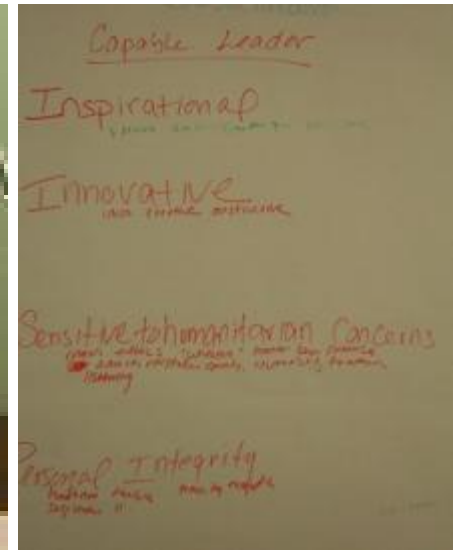

*Enrichment and acceleration*  
(the key for gifted education)

research amazingly  
consistent  
and commitment  
so persistent!

We saw books and  
cube-recursion  
and enjoyed a  
great excursion  
visiting the place of  
Hoover  
not less pretty than  
the Louvre...  
Every day – a new  
adventure  
leading to a  
common venture

The whole assisting staff was great:

accompanying those slightly late,

Observing if we really ate

and what is making leaders great

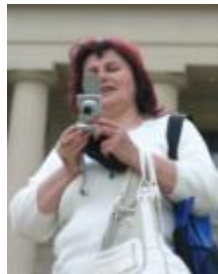

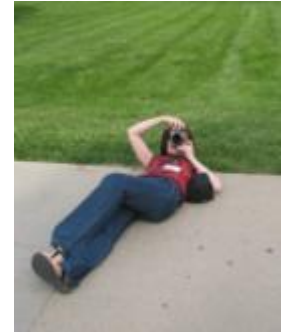

David gave us  
some release,

never asking:

*Please, say  
cheese!*

He survived the  
competition  
and receives  
some recognition.

The outputs are:

- Deep reflections
- Interesting ties, connections,
- Tools of insights and brainstorming
- Media rapidly transforming
- Effective great communications
- Dogs teaching us of persuasion,  
(Yogi Berra,  
some tall Asian)

This fantastic institution has made tremendous contributions to the gifted education and deserves appreciation. Its tree will be ever growing, its real pride - forever glowing!

# Thank you!

thank you, dear hosts,  
we can't possibly be  
most

grateful, happy,  
feeling blessed,  
to stay together, be  
the best

collaborators, sisters,  
brothers,

to share what we've  
learned with others!

Bulgarian interpretation,  
+ Ukrainian illustration  
of everybody's fascination  
of Templeton's great  
foundation.
